INDEX TO ILLUSTRATIONS.

Carinae,—Velocity Curve of Alpha..... 645
Cassiopeiae,—Light Curve of R Y..... 380
Cerro San Cristobal..... 524
Clerke,—Miss Agnes Mary, 166, Plate VII op..... 323
Color Chart Exposed without Filter..... 621
Comet,—Metcalf's New, Plate I, op..... 1
Comet *g* 1906 (Thiele)..... 50
—*h* 1906 (Metcalf), Orbit of..... 50
—*d* 1907, Sketches of.....432, 505
—*e* 1907,—Orbit of, Plate XIII, op..... 587
Computing Phi Minus Phi and Rho Prime..... 485
Constellation Charts.....44, 108, 178, 246, 306, 371, 328, 502, 567, 630
Counts of Stars on Pleiades' Negatives.....196, 198, 200, 201, 203
Cygni,—Chart of U Y..... 641
—Light Curve of U Y..... 640
—Light Curve of S U..... 119
—V Y 571
—193. 1906 Charted..... 254
Draconis,—Light Curve of 87. 1906..... 511
—Velocity Curve of Theta..... 646
—Velocity Curve of Omega..... 647
Eclipse of the Sun,—Annular..... 383
Gassendi,—Map of Ring-Mountain..... 491
Geminorum,—Chart of R R..... 642
—Light Curve of R R..... 642
Giacobini's Comet (1905 *c*), Plate II, op..... 65
(1907 *a*), Apparent Path of..... 248
Goldschmidt Law of Complication.....347, 348, 352
Gyroscope Illustrations.....82, 85, 87, 89, 92-3, 146, 148-152, 156-7-8, 159
Halley's Comet,—Diagram of..... 242
Light Curve of Cassiopeiae R Y..... 380
—Cygni, S U..... 119
—Cygni, U Y..... 640
—Cygni, V Y..... 571
—Cygni, 193. 1906..... 254
—Draconis, 87. 1906..... 511
—R R Geminorum..... 642
—Lyrae, W 98

—Mira (o Ceti) 96
—Persei, 120. 1906 380
—Vulpeculae, X 511
Location of the Observatories of the World 580
Lunar Eclipse,—Graphic Method for 534, 535
Lyrae,—Light Curve of W 98
Mars Drawings by W. Louise Leonard, Plate VIII op. 388, IBX and X op ... 390
Mercury Across the Sun,—Transit of 44, 489, 501
Method of Using Prof. Newcomb's Tables of the Planets 136, 137
Mills Expedition,—Chart of Star Distribution 526
Mira (o Ceti), Light Curve of 96
Observatories of the World 580
Observatory of D. O. Mills Expedition 523
—of Edinburgh,—City, Plate IV, op 177
—of Ottawa, Canada, Plate III, op 139
Orientation of Field of View of a Telescope 23
Origin of the Moon ..... 275, 277, 278 ,279
Orbit of Comet *c* 1907, Plate XIII, op 585
Orbit of Comet *a* 1907 373
—*b* (1907) 374
—*d* (1907) 505
—Spectroscopic Binary Lambda Andromedae 120
Pavonis,—Velocity Curve of Alpha 645
Persei,—Light Curve of 120. 1906 380
Planets' Path, 1907 ..... 42, 43
Pleiades Photograph, Plate V, op 193
—Taken on a Reticle 194
Polaris Vertical Circle Reductions 479
Protuberance on the Limb of the Sun, Plate VI op 260
Solar Apex 338, 342
Star Distribution,—Mills Expedition Chart of 526
Sun-Spots Sketched by E. D. Roe 447, 448
Tauri,—Vicinity of R and S 513
Vogel, Herman Carl, Plate XI, op 453
Trépied, Ch., Plate XII, op 519
Velocity Curve of Alpha Carinae 645
—Theta Draconis 646
—Omega Draconis 647
—Alpha Pavonis 647
—Kappa Velorum 646
Velorum,—Velocity of Kappa 646
Vulpeculae,—Light Curve of X 511

GENERAL INDEX TO VOLUME XV.

Age of the Earth's Consolidation, T. J. J. See 545
Aitken, R. G, First Catalogue of Double Stars 404
Albrecht, Sebastian, On the Distortions of Photographic Films on Glass 463
Algebra by A. H. Wheeler,—First Course in—notice 450
Andromedae,—Orbit of the Spectroscopic Binary Lambda 120
Annals of the Royal Observatory of Edinburgh, Vol II 187
Apex,—The Solar, Thomas Curran Ryan 205, 236
Approximate Magnitudes of Variable Stars .....
.....52, 115, 181, 251, 309, 376, 436, 506, 575, 635
April Meteors, W. F. Denning 168
Art of Computing, The, Roberdeau Buchanan 287
Asteroids,—Numbering Recently Discovered 634
Astronomical Phenomena during 1907 40
—Consequences of the Pressure of Light, J. H. Poynting 626
—Publications, Henry O. Severance 517
—Theory of the Molecule and an Electronic Theory of Matter, I, Severinus J. Corrigan 585
Astronomy,—Mathematics Needed for Professional, W. W. Payne 493
—A Plea for Elementary, Mary E. Byrd 25
—Mathematics Needed for the Study of Practical, W. W. Payne 600
—Present Time, W. W. Payne 72
—In 1906,—Progress in, E. Walter Maunder 1
Auhagen's Demonstration—note 445
Auhagen, William, A Demonstration 45
Aurora Borealis Observed, C. H. Thomas—note 256
Auroral Arch of August, 1903, Frederic Campbell—note 448
Display, A. G. Zambrano—note 516
Barr, J. Miller, The Study of Variable Stars 217
Binaries,—Spectroscopic—note 644
Bologne, Italy,—New Observatory of—note 257
Bootis,—Observations of V, Rose O'Halloran 512
Boyden Premium—note 516
Brashear's Summer Home, J. A.—note 514
Bright Rays of the Moon, H. G. Tomkins 296

Buchanan, Roberdeau, Methods of Using Professor Newcomb's Tables of the Planets 133
The Art of Computing 287
Burnham, S. W.,—Double Stars Discovered at Dearborn Observatory by G. W. Hough 624
Burnham's Catalogue of Double Stars, R. G. Aitken 404
Burns, K.—Spectrographic Observations of Venus for Solar Parallax 556
Byrd, Mary E., Astronomy in the High School V 227
—Plea for Elementary Astronomy 25
Calculus by Osborn—notice 320
Campbell, Frederic,—Auroral Arch, August 1903 448
Cassiopeiae,—R Y—note 380
Ceti,—Observations of *o*, Rose O' Halloran 381
Christie, W. H. M., Note on the Determination of the Wire-Intervals for a Transit Instrument 302
Clark and Sons Corporation, The Alvan, W. W. Payne 413
Clerke, Miss Agnes M., Hector Macpherson, Jr 165
—T. J. J. See 323
—Recollections of—T. J. J. See 323
Comet and Chinese—note 515
—1894 IV (E. Swift) F. H. Seares 433
—1906 *b* (Kopff) 307
—1906 *g* (Thiele) 49
—1906 *h* (Metcalf) 51
—1907 *a* (Giacobini) 248
—1907 *b* (Mellish) 307, 373, 431, 569
—1907 *d* 431, 432, 569
—1907 *d* Spectrum of 558
—1907 *d* (Daniel), O. C. Wendell 622
—1907 *e* (Mellish) 638
—Halley, F. W. Henkel 238
—Notes 49, 111, 247, 307, 372, 431, 569, 631
—to Strike the Earth,—Fake Report of 315
Comets,—Naked Eye, W. F. Denning 411
—of the Year 1906, H. Kreutz 421
Computation of a Planet's Anomaly and Radius Vector—note 648
Computers Wanted at U. S. N. Observatory 448
Comstock's Study of the Sun's Motion Relative to the Fainter Stars 190
Concerning the Constitution of the Ether, Luigi d'Auria 101
Cooke, W. Ernest, Perth Observatory Meridian Work 500
Cordeiro, F. J. B., The Gyroscope 81, 146
Corrigan's Article,—Mr. S. J.—note 641
Corrigan, Severinus J.—An Astronomical Theory of the Molecule and an

Electronic Theory of Matter, I..... 585
Cortie, A. L., Problems of Solar Physics..... 173
Couvoisier, L., Leo De Ball's Refraction Tables..... 456
Cygni, Light Curve of V Y..... 57
Daniel, Zaccheus, Venus as a Luminous Ring..... 516
d'Auria, Luigi, A New Development in the Kinetic Theory of Gases..... 210
—Concerning the Constitution of the Ether..... 101
—Errors Discovered in Kinetic Theory of Gases and Application to it of Newton's Second Law of Motion, Etc..... 357
Day, The Sidereal, J. Morrison..... 12
Denning, W. F., April Meteors..... 168
—Motion of Red Spot on Jupiter..... 398
—The Red Spot on Jupiter..... 606
Distance of the Sun,—Recent Measurements of the—note..... 385
Distances of Fixed Stars—note..... 583
Distant Stars—note..... 517
Distortions of the Photographic Films on Glass,—Sebastian Albrecht..... 463
Distribution of the Stars, Hector Macpherson, Jr..... 400
Doolittle, Eric, Transit of Mercury..... 644
Double Star Beta 612,—Elements of..... 648
Double Stars,—First Catalogue of, R. G. Aitken..... 404
—Stars Discovered by G. W. Hough, S. W. Burnham..... 624
Draconis,—Light Curve of 87.1906..... 510
Drawings of Mars, W. Louise Leonard..... 388
Earth Before the Earth-Moon Catastrophe, G. D. Swezey..... 397
Earthquakes and Other Phenomena Connected with the Physics of the Earth, —Cause of—note..... 315
Earth's Consolidation,—Age of the, T. J. J. See..... 545
Eclipse of the Moon, July 24,—Partial—note..... 384
—of the Sun, July 10—Annular—note..... 383
—of January 3, 1908,—Solar, William F. Rigge, S. J..... 610
Eclipses of the Sun, The Ancient, E. Nevill..... 32
Elements of Comet *g* 1906, (Thiele)..... 49, 112
—*h* 1906..... 51, 126
—*a* 1907 (Giacobini)..... 248, 373
—*b* 1907..... 373
—*c* 1907..... 431
—*d* 1907..... 632,
—*e* 1907..... 632
—Comets..... 49, 51, 112, 126, 248, 373, 431, 570, 632, 633, 634
—Variable Stars (new)..... 119, 184, 379, 443, 512
Ephemeris of Jupiter's Sixth Satellite..... 110
—of Physical Observations of the Sun..... 110

—Comet *d* 1906 (Finlay) 112
—*g* 1906 ..... 49, 112, 113
—*a* 1907 ..... 249, 307, 631
—*d* 1907 ..... 433, 504, 632
—*e* 1907 ..... 632, 633
Ephemerides of Comets 49, 112, 249, 307, 433, 504, 631, 632, 633
Errata 192, 258, 321
Errors of a Photographed Réseau—note 318
Ether,—Concerning the Constitution of the, Luigi d'Auria 101
Evening Sky for February—note 191
Falling Bodies,—Phenomena of—note 124
Fauth, Ph.—Rills on the Moon 490
Fauth's Moon in Modern Astronomy, W. W. Payne 450
First Course in Algebra by A. H. Wheeler—notice 450
Friendly Stars, Flora E. Harpham—notice 384
Geminorum,—U. J. Voute—note 383
—Observation of, Rose O'Halloran 382
General Notes 58, 120, 186, 256, 313, 383, 444, 514, 577, 642
Geometrical Considerations Applied to the Velocity of Comets, John B. Wood 553
Gill, Sir David, Presidential Address 467, 528
Goldschmidt Law of Complication Applied, William Herbert Hobbs 343
Graphic Method for Lunar Eclipses, Kurt Laves 533
Griggs, H. W., Lantern Projection Distances 316
Gyroscope,—The, F. J. B. Cordeiro 81, 146
Hadden, David E., Review of Solar Observations for 1906 607
Hagen's Astrophotographic Journey,—Father, William F. Rigge, S. J. 18, 326
Hale, George E., Solar Observatory Work 563
Halley's Comet,—Perturbations of—note 317
—F. W. Henkel 238
Harpham, Flora E., Friendly Stars 384
Hassard on the Aurora Borealis—note 256
Henkel, F. W., Halley's Comet 238
Hervey, A. B., Northern Lights 446
Hobbs, William Herbert, Goldschmidt Law of Complication Applied to the Solar System 345
Holmes, Edwin, The Shadow-Bands 77
Hough,—Double Stars Discovered at Dearborn Observatory by G. W., S. W. Burnham 624
How to Obtain the Position of a Star from a Photograph, C. D. Perrine 260
Important Problems in Astronomy, Sir David Gill 467
Integral Elegantly Reduced by Hyperbolic Functions, Francis Rust 581
James, G. O., Reducing Polaris Vertical Circle Observations 475
Journal of the Astronomical Society of Canada—note 257

Jupiter, Motion of the Great Red Spot, W. F. Denning..... 398
—Red Spot on, A. Stanley Williams..... 560
—The Red Spot on, W. F. Denning..... 606
Jupiter's Satellites, A Rare Phenomenon—note..... 191
—Sattelites, Phenomena of.....48, 109, 179, 247
—the Sixth of..... 110
Kinetic Theory of Gases—note..... 395
—New Development of, Luigi d'Auria..... 210
Klotz, Otto, Transmission of Time..... 129
König, E., Non-Screen Orthochromatic and Panchromatic Plates by Bathing 620
Kreutz, H., Comets of the Year 1906..... 421

—Distribution of the, Hector Macpherson, Jr 400
—Sparsity of the, J. F. Lanneau 390
—Systematic Motions of the—note 122
Stellar Magnitudes,—Standard, Edward C. Pickering 303

Strobant's Observatories and Astronomers—note..... 579
Studies in Sensitometry—note..... 319
—of the Thermodynamics of the Atmosphere—note..... 316
Study of Pure Mathematics—note..... 120
—Variable Stars, J. Miller Barr..... 217
Sun,—Ephermeris for Physical Observations of..... 110
—On Ancient Eclipses of the, E. Nevill..... 32
—On Annular Eclipses of the—note..... 383
—On Recent Measurements of the Distance of the—note..... 385
Sun's Motion Relative to the Fainter Stars—note..... 190
Sun-Spot Observations in 1906,—Resumé of, Anne S. Young..... 127
—Periods,—Computed Epochs of Maxima and Minima—note..... 188
Sun-Spots,—Great, E. D. Roe, Jr..... 447
—Level of the—note..... 187
—In Line of Sight—Motion of Vapors—note..... 319
Swan, D. S., Brilliant Meteor—note..... 188
Swezey, G. D., Earth Before Earth-Moon Catastrophe..... 397
Tablets of Nippur,—Mathematical, David Eugene Smith..... 336
Tauri,—Observations of R, Rose O'Halloran..... 513
—Observations of S, Rose O'Halloran..... 514
Telescope,—Orientation of the Field of View of a, E. T. Whitelow..... 22
Telescopic Meteors, Joel H. Metcalf..... 29
The Gyroscope, F. J. B. Cordeiro..... 81
Thermodynamics of the Atmosphere,—Studies of the—note..... 316
The Shadow-Bands, Edwin Holmes..... 77
Thomas, C. H., Observed Aurora Borealis—note..... 256
Time Service in Dominion of Canada Observatory—note..... 321
Todd, David, Lowell Expedition to the Andes..... 551
Tomkins, H. G., The Bright Rays of the Moon..... 296
Transit of Mercury, November 14, 1907, William F. Rigge, S. J..... 488
—Eric Doolittle..... 644
—William H. Pickering..... 643
—Winslow Upton..... 643
Transmission of Time, Otto Klotz..... 129
Trépied, Ch., M. Loewy..... 519
Two Methods of Reducing Polaris Vertical Circle Observations with the Engineer's Transit, G. O. James..... 475
Universe by J. Cosand,—New Theory of the—note..... 125
Urania in Lake Muskoka—note..... 514
Variable Star BD+37°811..... 313
—Notes, Rose O'Halloran..... 381, 512
—Section Reports—note..... 318
—Study of, J. Miller Barr..... 217

Variable Stars.....52, 114, 180, 249, 255, 308, 374, 436, 506, 571, 635
—in Harvard Maps,—Fifteen New, Edward C. Pickering..... 617
Venus as a Luminous Ring, H. N. Russell and Z. Daniel—note..... 516
Venus for Solar Parallax,—Spectrographic Observations of, K. Burns..... 556
Vogel, Herman Carl, Hector Macpherson, Jr..... 453
Voute, J., U Geminorum—note..... 383
Vulpeculae,—Light Curve of Chi..... 511
Warner and Swasey Company—note..... 514
Wave-Lengths from Gratings—Absolute—note..... 385
Wendell, O. C., Comet *d* 1907 (Daniel)..... 622
What Are the Canals of Mars?—note..... 579
Wheeler, A. H., A First Course in Algebra—notice..... 450
Whitelow, E. T., The Orientation of the Field of View of a Telescope..... 22
Williams, A. Stanley, Red Spot on Jupiter..... 560
Wilson, H. C., On the Number and Distribution of the Stars in the Vicinity of the Pleiades..... 193
Wire-Intervals for a Transit Instrument—Note on Determination of the, W. H. M. Christie..... 302
Wood, John B., Geometrical Considerations Applied to the Velocity of Comets 553
Year Book Number 5, for 1906, of the Carnegie Institution—note..... 186
Young, Anne S., Resumé of Sun-Spot Observations in 1906..... 127
Zambrano, A. G., Auroral Display—note..... 516
